★ = NEW OR CHANGED IN jQuery 1.7 / f(x) = FUNCTION / a = ARRAY / jQ = jQuery / El = ELEMENT / 0-1 = BOOLEAN / Obj = OBJECT / N/M = NUMBER / Str = STRING

✱ CORE

jQuery.holdReady(hold) *u*
Holds or releases the execution of jQuery's ready event.

jQuery.O *jQ*
Accepts a string containing a CSS selector which is then used to match a set of elements.
jQuery(selector [, context]) - jQuery(element)
jQuery(object) - jQuery(elementArray)
jQuery(jQuery object)

jQuery.noConflict([removeAll]) *Obj*
Relinquish jQuery's control of the \$ variable.

jQuery.sub() *jQ*
Creates a new copy of jQuery whose properties and methods can be modified without affecting the original jQuery object.

jQuery.when(deferreds) *pr*
Provides a way to execute callback functions based on one or more objects, usually Deferred objects that represent asynchronous events.

✱ SELECTORS

All Selector ("")
Selects all elements.

:animated Selector
Select all elements that are in the progress of an animation at the time the selector is run.

Attribute Contains Prefix Selector [name] = "value"
Selects elements that have the specified attribute with a value either equal to a given string or starting with that string followed by a hyphen (-).

Attribute Contains Selector [name]*="value"
Selects elements that have the specified attribute with a value containing the a given substring.

Attribute Contains Word Selector [name]~="value"
Selects elements that have the specified attribute with a value containing a given word, delimited by spaces.

Attribute Ends With Selector [name] \$="value"
Selects elements that have the specified attribute with a value ending exactly with a given string. The comparison is case sensitive.

Attribute Equals Selector [name]="value"
Selects elements that have the specified attribute with a value exactly equal to a certain value.

Attribute Not Equal Selector [name] != "value"
Select elements that either don't have the specified attribute, or do have the specified attribute but not with a certain value.

Attribute Starts With Selector [name]^="value"
Selects elements that have the specified attribute with a value beginning exactly with a given string.

:button Selector
Selects all button elements and elements of type button.

:checkbox Selector
Selects all elements of type checkbox.

:checked Selector
Matches all elements that are checked.

Child Selector ("parent > child")
Selects all direct child elements specified by "child" of elements specified by "parent".

Class Selector (".class")
Selects all elements with the given class.

:contains() Selector
Select all elements that contain the specified text.

Descendant Selector ("ancestor descendant")
Selects all elements that are descendants of a given ancestor.

:disabled Selector
Selects all elements that are disabled.

Element Selector ("element")
Selects all elements with the given tag name.

:empty Selector
Select all elements that have no children (including text nodes).

:enabled Selector
Selects all elements that are enabled.

:eq() Selector
Select the element at index n within the matched set.

:even Selector
Selects even elements, zero-indexed.

:file Selector
Selects all elements of type file.

:first-child Selector
Selects all elements that are the first child of their parent.

:first Selector
Selects the first matched element.

:focus selector
Selects element if it is currently focused.

:gt() Selector
Select all elements at an index greater than index within the matched set.

Has Attribute Selector [name]
Selects elements that have the specified attribute, with any value.

:has() Selector
Selects elements which contain at least one element that matches the specified selector.

:header Selector
Selects all elements that are headers, like h1, h2, h3 and so on.

:hidden Selector
Selects all elements that are hidden.

ID Selector ("#id")
Selects a single element with the given id attribute.

:image Selector
Selects all elements of type image.

:input Selector
Selects all input, textarea, select and button elements.

:last-child Selector
Selects all elements that are the last child of their parent.

:last Selector
Selects the last matched element.

:lt() Selector
Select all elements at an index less than index within the matched set.

Multiple Attribute Selector [name]="value" [name2]="value2"]
Matches elements that match all of the specified attribute filters.

Multiple Selector ("selector1, selector2, selectorN")
Selects the combined results of all the specified selectors.

Next Adjacent Selector ("prev + next")
Selects all sibling elements matching "next" that are immediately preceded by a sibling "prev".

Next Siblings Selector ("prev ~ siblings")
Selects all sibling elements that follow after the "prev" element, have the same parent, and match the filtering "siblings" selector.

:not() Selector
Selects all elements that do not match the given selector.

:nth-child() Selector
Selects all elements that are the nth-child of their parent.

:odd Selector
Selects odd elements, zero-indexed.

:only-child Selector
Selects all elements that are the only child of their parent.

:parent Selector
Select all elements that are the parent of another element, including text nodes.

:password Selector
Selects all elements of type password.

:radio Selector
Selects all elements of type radio.

:reset Selector
Selects all elements of type reset.
